Allowable Subject Matter

2. After a further search and a thorough examination of the present application and in light of the prior art made of record, claims 1-6 are found to be in condition for allowance.

Reasons for Allowance

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose an image data filtering method for reducing blocking effect and noise comprising the steps of generating two-dimensional binary edge map representing whether each pixel is filtered, filtering by applying a predetermined filter window to the generated binary edge map, wherein the performing the filtering comprises not performing filtering if the central pixel of the filter window is an edge.

The closest prior art (Kim US Patent no. 5,475,434) discloses a similar filtering method, however, Kim fails to particularly teach or suggest "*generating two-dimensional binary edge map representing whether each pixel is filtered, filtering by applying a predetermined filter window to the generated binary edge map, wherein the performing the filtering comprises not performing filtering if the central pixel of the filter window is an edge.*" as claimed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gims S. Philippe whose telephone number is (571) 272-7336. The examiner can normally be reached on M-F (10:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571) 272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
